

THREAT INTELLIGENCE

FOR SOC AND SECOPS

Cyber Threat Intelligence tailored to the requirements of SecOps teams, enabling efficient utilisation for threat detection, prevention, triage, investigation, and threat hunting.

We provide specific tools for efficient security operations to minimise false positives and enhance threat detection and prevention through comprehensive context enrichment.

RST Report Hub

A daily feed of blogs, articles, reports, transformed into STIX 2.1 and other formats

RST CTI Assistant

AI interface to interact with all other APIs and feeds and create smart automation scenarios

RST Threat Library

Profiles of adversaries. Information on malware and tools used by threat actors

RST Noise Control

An API to detect known-good or potentially noisy indicators

RST Threat Feed

Threat feeds aggregated, enriched, validated, and ranked across hundreds of TI sources

RST IoC lookup

An API to detect known bad, malicious or suspicious indicators

Partners and integrations
